the
climate.**

With certified green
electricity from ENTEGA

Dekodur GmbH & Co. KG

Langenthaler Straße 4, 69434 Hirschhorn

**decided to obtain green electricity NATURpur
from ENTEGA Geschäftskunden GmbH & Co. KG.**

The accordant consumption of electricity in the expected annual quantity of approximately 720.000 kWh is generated from renewable energy. The provided green electricity is generated in identifiable hydro-electric power plants in Germany and will be fed in the common electric power system.

TÜV Rheinland confirms that NATURpur green electricity (hydraulic energy) is regeneratively produced energy according to the list of criteria of VdTÜV bulletin 1304 (edition 02/05).

In obtaining ENTEGA green electricity NATURpur Dekodur GmbH & Co. KG annually avoids the development of approximately 374 tons of the climate-damaging gas carbon dioxide (CO₂) and valuably contributes to environmental protection.

**The contract period for obtaining green electricity is from
01.08.2011 bis 31.12.2014**

Darmstadt, 01.08.2011
